The information has been collected principally from persons who have been engaged in the various "round aps" held since the 20th of May. Along the base of tremountains, and ex tenting but several miles on the plains, the tenting out several miles on the phans, the range has been overstocked with cattle, sheep, and horses, and stock is not generally in good condution. Summit, Lake, Park, 're mont, and Costilla, from which reports have been received, the general statement is that the range is in excellent condition, and that cattle have never couge through the Winter with less loss, and were never in better condition for summer grazing. While at a round-up at the ranch of Wison typos., in Fibert County, I saw seventy three read of three year olds se ected from a banch of one hundred and fifty head, estimated to average eleven hundred and fifty bounds, and as line beef as ever went to the sham less.

Sheep have done we'l, are in good condition, and in fair demand. The large demand for beef and mutton in the mining districts, and the was sens of a still East. ern market, coup ed with the fine candition o the cattle, is exceedingly kratifying, in view of the effect these facts will have upon business in the 'erritury. Losses caused by grasshoppers will be more than made good by the unexampled prosperity of this leading industry of Colorado.
